

GSP600 Sub-Prime® Electric Submersible Dewatering Pumps

The line of Godwin Sub-Prime GSP electric submersible pumps is designed for large dewatering applications requiring high head or high volume. Specifically, the GSP600 is capable of flow rates to 3,650 gpm (230 l/sec.) and discharge heads to 338 feet (103M). Like the small dewatering and trash handling models in the Sub-Prime line, these large dewatering submersible pumps are suited to tough construction, mining and industrial applications. They feature a slim-line design ideal for fitting into confined spaces and rugged construction for longer life, specifically a cast chromium steel impeller and heavy duty polyurethane coated adjustable wear parts. The GSP600 also features oil bath tandem mechanical seals for dry running and extra protection against leakage.

Features

- Convenient top discharge
- Compact slim-line design
- Oversized power cable
- High performance submersible motor
- Oversized, heavy duty ball bearings
- Oil bath tandem mechanical seals – Tungsten Carbide on Tungsten Carbide primary seal
- Cast Chromium Steel impeller and heavy duty polyurethane coated adjustable wearparts
- Lightweight aluminum and corrosion resistant stainless steel cooling jacket
- Dry running capabilities
- Optional manual and automatic control panels available
